## ABOUT ME

Hi I'm Robert, currently a junior web developer.

I'm passionate in making front-end UI/UX design with different libraries such as React.js, Vue.js, Bootstrap, MUI, Three.js. I want to continue learning and growing my technical skill not only in front-end, but also back-end development with node.js, database management and web hosting.

---

## EDUCATION HISTORY

### 2016-2019

**Bachelor of Information Technology** Queensland University Of Technology

- Basic and advanced methods of web development
- Mostly played developer role in teamwork.

### 2020 - 2021

**Professional Year at** Navitas

- 3-month Internship at Centra Networks.
- Developed Professional Communication skills
- Developed the "Work hard - Play hard" approach to life and work.

---

## WORK EXPERIENCE

6/2022 - 11/2022

**Junior Web Developer**, Pakko

- Maintain and update main website at <https://Pakko.com.au/> with Wordpress.
- Design and create different web templates for internal usage.
- Create layout for IDP project at <https://idp.pakko.com.au/>
- Implement different UI/UX design/functionality for the IDP project, including: changing box color, control box with a 3d view cube, design options for customer when clicking on different surfaces
- Custom image editor for IDP with fabric.js. Apply the image saved in the image editor to the panel.
- Back-end development with node.js

### 7 /2020- 1/2023

**Operations Manager**, Star Seafood Moorooka

- Train, develop existing and new staffs in any role required in the shop (e.g Cooking, Crumbing, Taking Orders, Making Burgers)
- Ensure high standard of customer services.
- Organize duties for staffs, encourage and motivate them to achieve daily and weekly goals (Making orders, Maintenance, Preparing )
- Ensure food and safety standards with weekly maintenance
- Directly involved in food making with guidance to staffs to provide best food quality.

**11/2020-2/2021**

**Web Developer/Designer Internship, Centra Networks**

- Learn how to make and modify designs with photoshop.
- Design and implement service ticket template.
- Modify posters for CSAT (Centra Security Awareness Training) for internal use.
- Create a new catalogue design to introduce Centra Networks, with update of terms, services and conditions.
- Implement a referral page for the referral campaign.

---

## PROJECTS

**5/2021 - 6/2021, Khoa Stories**

- Create a blog site on Wordpress.
- <https://khoastories.com/>

**2/2021 - 3/2021, Dlep Tran Photography**

- Create a website through Wix for food, drink, lifestyle, action photo showcase.
- <https://www.tranfoodphotography.com/>

**4/2018 - 6/2019, Da Nang ZeroWaste Alliance**

- Cooperate with other designers to make a banner for encouraging people to put rubbish correctly to designated bin.
- Design signature bins relevantly to different kind of rubbish.

**University Music Website Project (Graduation Project)**

- using HTML/CSS/JS and implement it to a local server for testing and data storing.
- Designing the website and making the local server with XAMPP

---

## SKILLS

**Web design and Implementation**

In most of my projects at <https://roberttran.netlify.app/>, React/Nextjs, CSS/HTML are used to implement the design.  
Vue/Nuxtjs was also used for some draft templates.

During the most recent project at <https://idp.pakko.com.au/>, I mainly used React.js, React Three Fiber, Material UI, Node.js, AWS Amplify and Figma

**Basic Design with Photoshop, Illustration**

During the internship at Centra Networks, apart from making email template and maintaining the website, I was assigned to design banners and internal posters with Photoshop, Illustration.

**Keywords: HTML, CSS, Javascript, React/Nextjs, Vue/Nuxtjs, Bootstrap, MaterialUI, Photoshop, Wordpress, Illustration, Figma, GraphQL**
